Le, three have passed from us away, And mingle with the dead, neath the silent sod they lay. The deep, damp grave their bed.

The levely morn appears in view, Night's curtain is withdrawn, We rise, our labor to pursue, But three, ab, three are gone

We round the family altar bend, And lift our hearts in prayer, To Him who doth each blessing send, But three are absent there.

Our bodies to supply, We see three vacant places there, And for the absent sigh. Throughout each busy passing day,

And when we to our meals repair,

We often think of those Who yonder in the churchyard lay, In silent, calm repose.

Our cheerful fire we gather tound, When daily toil is done, But those three there no more are found Who lately cheered our home.

When comes again the smiling spring, And decks the earth with flowers, Their merry laugh no more shall ring Amid her lovely bowers.

They, like the gentle blooming flower That falls before the blast, nd dies within a fleeting hour, Away from earth have passed. In early morning ere their sun

Of life had risen high, Death boldly took them one by one, In mansions derk to lie, Death came and early sought Those leved ones for his prey,

And parents' grief he heeded not, But took those three away. He came and bid each spirit flee Its feeble house of clay,

And leave that tenement to be To loathsome worms a prey. But angels from the world above, Came down to see them die, And upward bore, on wings of love,

Each spirit to the sky. They took them up to sing the song Of those around the throne. And join the happy spirit throng That through bright glory roam.

They drink from that pure stream that flows For all the ransomed free, And est embrosial truit that grows On life's unfailing tree.

A bright and beauteous dress In Jesus' sight they wear, and glorious crowns of righteousness And palms of victory bear.

Yes, they have gone, but shall we mourn And in deep anguish pine? O, could we wish them to return From Heaven's happy clime?

Although unseen by mortal eye, E'en now perhaps they come, From that bright world of joy on high, To see their early home.

They come to whisper words of cheer, When troubles deep assail, And bid us onward persevere, 'Till life with us shall foil.

They whisper words of hope and love, When sorrows bow us down. And bid us lift our thoughts above,

To an immortal crown. Le! age on age shall pass away, And seasons roll their rounds, Yet God shall watch their sleeping clay,

"Till the last trumpet sounds Then sleep in peace, ye ashes aleep, Amid the graveyard throng. Ye spirits blest your lyres e'er sweep, And sing redemption's sorg.

And thou who took our loved ones home, We pray thee he our guide, Till thou shalt bid our spirits come,

To join the glorified. J. R. PENNINGTON.

About Turnips.

Turnips may remain in the field till late. They are far less injured by the frost than many are inclined to believe. It is very often the case that turnips are frozen into the ground, and on the frost breaking up again in the course of a few days are removed as hard and crisp as before. The Executed with neatness and dispatch at this Office action of the soil neutralizes its effects, and sometimes a succession of warm weather, after a freezing night, adds as much to the weight and value of the crop as they gained in twice the time before the advent of severe cold. A low temperature is favorable rather than adverse to the development of the species of the turnip tribe. Cabbages grow rapidly in cold weather; hence the practice so prevalent at present of allowing them to remain out till snow falls. In packing turnips of all tinue their subscription kinds, care should be taken to secure them effectually against the light and air. The send them until all arrearages are paid more perfectly this is accomplished, the ing well, and the more wholesome and nutritive will they be found, both for stock and for table use .- N. E. To Prevent Milk from Souring. A correspondent of the Ohio Farmer gives the following plan:

"Agreeable to your request, I will give an account of our experience in the dairy business, in regard to preserving milk from becoming sour. We have kept from fitty to a hundred and fifteen cows for several years, and have milked seventy the past years, and have milked seventy the past commodation of guests. That is kept sweet until morning with very little trouble, when we strain in the morning's milk, which is warmed sufficiently by heating the water in the wooden vat. Thus we proceeded until Saturday night, when the milk is set and the curd made, and made into cheese. Sunday morning the milk is strained in wooden bowls, which are painted inside and out with a thick coat of paint, smooth and hard, and set in a cool place on the cellar floor, where it keeps sweet until Monday when it is skimmed and made into cheese The result has been that we have not lost a bowl of milk for the past summer."
